

InternetAnywhere®

Go-Anywhere, High-Speed Internet Access

Wherever Business Takes You, Stay Connected

In the judicial system, court reporters often work long hours to provide real-time transcripts, meet deadlines, and correspond with scopists to transcribe case notes. Often reporters are dependent upon counties for their Internet connectivity and ultimately are at the mercy of the facility. Struggling with slow public WiFi, and expensive cellular data hotspots as alternatives, court reporters face unnecessary obstacles in their everyday work.

InternetAnywhere is designed to provide onboard WiFi connectivity for court reporters during mobile, remote, and redundant applications. Without the hassle of configuring hardware, dealing with cell phone companies, or complex data plans, InternetAnywhere provides stable connectivity over the nation's leading 4G LTE networks.

How Does It Work?

Compact and on-the-go, our solution provides reporters with the speed and convenience of broadband Internet anywhere business takes them. InternetAnywhere is preconfigured with an onboard WiFi hotspot that supports up to 50 users, giving court reporters the power of connectivity where traditional Internet connections are not an option.

InternetAnywhere features AlwaysOn™ technology so that high-speed connectivity doesn't go to sleep like other consumer-grade options. It also features fully managed hardware and a static public IP address, making it possible for reporters to initiate VPN connections and access critical day-to-day work. Complete with data-usage alerts, data bundling, a low annual access fee, and a convenient pay-as-you-go business model, InternetAnywhere provides the reliable, professional-grade connectivity you need at a low, predictable cost.

Better Reporting & Peace of Mind

There are many freelance court reporters in the field that travel from location to location to provide real-time reporting. Mobile WiFi that's dependable and affordable comes in handy. It's not only important for these reporters to be accurate but to be timely and dependable as well. By offering InternetAnywhere, we take the guesswork out of connectivity. Court reporters no longer have to worry about connectivity from courtroom to courtroom when they have their InternetAnywhere device.

Key Features

- Dependable Mobile Internet Connectivity
- Strong Signal in Any Building
- AlwaysOn™ Mobile WiFi Hotspot
- Live-In-Five™ Compact Hardware
- Fully Managed Service:
 - Preconfigured Hardware
 - Managed Updates
 - Remote Support & Monitoring
 - Low-Cost Connectivity
 - Multi-Device Data Pooling
 - Nationwide 4G LTE Coverage
 - Simple, Unified Billing
 - Lifetime Warranty

“I was paying for one Verizon hotspot, not to mention the second hotspot I had to purchase for going over the “unlimited” data on the first hotspot. When I’m working in the courtroom or in the evenings for production, consuming over the data cap is common. InternetAnywhere gives me more than enough WiFi at a nominal monthly cost. The equipment was more than worth the cost of my work style and demands. Worth every penny!”

— Reagan Evans, Court Reporter
