

Key Features:

- Akative Nationwide Unlimited Data¹
- Nationwide 4G LTE Coverage
- Rugged Mobile Internet Connectivity
- AlwaysOn™ Mobile WiFi Hotspot
- Preconfigured 4G Modem
- Low Cost Connectivity
- Simple Billing Options
- No Contract Service

InternetAnywhere® RV

Go-Anywhere, High-Speed Internet Access For Recreation

Why InternetAnywhere?

InternetAnywhere is the ideal 4G/5G cellular Internet connection for recreational vehicles (RVs) of all kinds. It provides connectivity on-the-go without the hassle of stopping at a marina or a campground just to connect to the Internet.

Satellite Internet access systems are often expensive and logistically challenging to implement. With our high-power antennas, InternetAnywhere provides better connectivity than traditional options. With InternetAnywhere's 4G/5G LTE coverage and 24/7 connectivity, travel planning, usual web browsing, streaming movies, and staying connected to friends and family is more easily accessible.

Strong Connectivity & Unlimited Data

Experience the speed and convenience of broadband Internet anywhere without the hassle of configuring hardware, dealing with cell phone companies, or complex data plans. InternetAnywhere is preconfigured and has an optional onboard WiFi hotspot that supports up to 25 users, giving you the power of connectivity where traditional Internet connections are not an option.

InternetAnywhere features AlwaysOn™ technology, so your high-speed Internet connection doesn't go to sleep like other consumer-grade options. Enjoy our Akative Nationwide Unlimited Data plan capped at 300 GB/month to video chat and stream movies!

Unlimited Data Plans

No Contract Required

Nationwide Coverage

Complete Solution

How It Works

To add InternetAnywhere to your RV, a multipurpose antenna can be installed on the roof or within the RV near a window, while the InternetAnywhere device is installed within the vehicle. Once installed, the robust, low-profile, vehicle-mounted antennas often provide connectivity when cellular service is unavailable with smartphones. Easily setup your WiFi network to work with your devices by assigning the same SSID and password to the WiFi system in your RV to avoid having to reconfigure your WiFi devices. Once setup, users can automatically connect smartphones, tablets, laptops, FireTV/AppleTV, and other devices via standard WiFi.

No Contract Service

Only pay for what you need. As many people only use their RVs seasonally, InternetAnywhere offers a month-to-month, no contract service on the Verizon network. When you're done using your RV for the season, Akative deactivates your InternetAnywhere service and halts billing. When the next season comes around and you're ready to use your RV again, simply contact Akative to restore services, pay a small \$25 reactivation fee, and you're ready to hit the road!

InternetAnywhere Hardware

Our quick installation kit includes everything you need to install InternetAnywhere service in your RV. Bundle includes dual magnetic antennas, 4G-LTE modem, 12v to 110v power inverter and a PoE powered WiFi access point, allowing you to mount the WiFi access point near your users. Requires switched 12v-DC power (typically connected to an accessory circuit in your RV).

InternetAnywhere Hardware Packages & Pricing

InternetAnywhere RV Basic: **\$349.95**

- Akative RB11 4G-LTE Bridge (Category-3 LTE, 100Mbps x 50Mbps max)
- Preconfigured SIM card
- Wireless access point, 2.4Ghz, 300Mbps, MIMO, PoE powered with passive PoE power supply
- 25' cat-6 Ethernet cable
- 7dBi, magnetic base, MIMO SMA Male Antenna (2-pack)
- 300 watt 12v-DC to 110v-AC power inverter
- 8" 110v outlet extension cord (allows connecting power bricks to power inverter) (2-pack)

InternetAnywhere RV Boost: **\$399.95**

Includes all the same hardware as InternetAnywhere RV Basic, but upgrades the wireless access point to 802.11ac WiFi, 2.4Ghz & 5Ghz, 1200Mbps, PoE powered with passive PoE power supply.

Akative Nationwide Unlimited™ No Contract Data Plans

Monthly Data Cap	300 GB	300 GB	300 GB
Data-Authorized For Any Lawful Purpose ¹	✓	✓	✓
External Static IP Address	Optional (\$10/Month)	Optional (\$10/Month)	Optional (\$10/Month)
Monthly Price¹	\$99.95	\$139.95	\$274.95

Note 1 – Akative Nationwide Unlimited RV/Small Business Data Plans are data-capped at 300GB/month to prevent the possibility of data overage charges. In the event that 300GB/month is not sufficient, multi-sim options are possible, contact Akative sales for details. Data speed is up to the 'Speed Tier Limit' and is not guaranteed. Data above the Speed Tier Limit is based on best effort and may be deprioritized if cellular networks are congested. Purchasing higher plans improves both the Speed Tier Limit and the High Priority Data Service level but does not change the overage limit of 300GB/month. Partial months when adding or removing services will be prorated based on the number of days lines are in-service. Akative Unlimited plans described above do not pool with other Akative pooled data plans and are priced on a per-line basis. Organizations may have pooled data lines with Akative for some locations while having other lines using the plans listed above which do not pool with other Akative data plans. Coverage is based on use in the continental US only and is based on using only Akative approved hardware devices. Pricing is for data service only which is not to be used as a SIM card for cell phones. If you have your services halted/deactivated, you will be charged a \$25 reactivation fee to restore services. All pricing is subject to change without notice. Additional taxes and fees may apply. ©Akative, 2022 – v5.9.22 - Akative, All Rights Reserved.

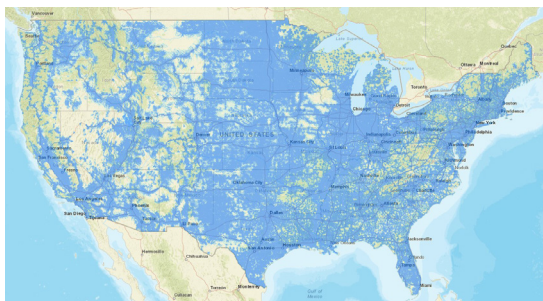

Why Choose InternetAnywhere®

Top Reasons To Go With InternetAnywhere

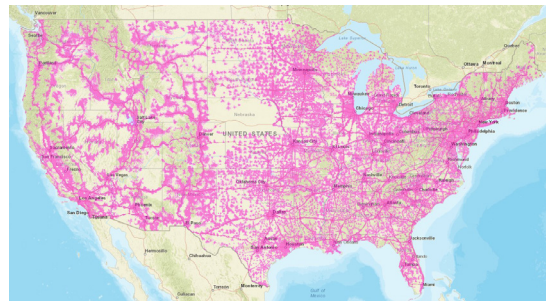

1. InternetAnywhere does not require a contract. With a month-to-month plan you can start and stop service as you need, so you don't pay for the months when you aren't using it.
2. Our Akative Nationwide Unlimited™ data plan is capped at 300 GB/month – far more than other competing plans.
3. InternetAnywhere is a complete solution, including both the hardware and the data.
4. Use InternetAnywhere while on-the-go and when you're parked. Other solutions such as T-Mobile Home Internet are for fixed locations only (not meant for RVs), or providers like Starlink will deactivate your service if you attempt to use it while driving.
5. Install/setup InternetAnywhere once and forget about it. Other solutions require you to install/setup hardware at each campsite.
6. InternetAnywhere is compatible with TV streaming services such as FireTV and AppleTV.
7. InternetAnywhere is backed by a U.S.-based support team that can be contacted should you need help.
8. With data coverage through Verizon, InternetAnywhere has the largest 4G LTE data coverage in the U.S. compared to the other top 4G LTE providers.
